EXPERIENCE

APsignals Bootcamp

Education Team

London, UK

Oct 2022, Present

- APSignals is a 9-month all-encompassing web development program aiming to up-skill students to become highly-skilled full-stack developers and also providing work experience in the advanced course.
- Technical skills learnt in general courses: HTML,CSS,JS,React,Node.js,Express.js and MongoDB.
- High-quality learning experiences that foster growth and development in students are provided by our education team.
- Innovative educational programs and resources that inspire curiosity and promote lifelong learning are created by our passionate team.
- The key to unlocking potential and achieving success is believed to be education by our team, which is why learners are empowered with the knowledge and skills they need to thrive.

NextJS Todo List Project

FullStack Web Developer, [Link-ToDo Project](#)

Gilan, Iran

Agu 22, 2023

- A Todo List application using next js had been developed by me.
- The todo items were stored using Redux, ensuring efficient state management and seamless data flow.
- For the user interface, the Material-UI (Mui) framework was incorporated, giving the application a visually appealing and responsive design. Additionally, form functionality was implemented using the React Hook Form library, allowing for easy and efficient handling of form inputs and validations.
- A standout feature of the application was the inclusion of a dark mode functionality, offering users the ability to switch between light and dark themes to suit their preferences.
- To ensure the robustness and reliability of the application, thorough unit and integration tests were written using Jest and React Testing Library. This helped in identifying and resolving any bugs or issues, improving the overall quality of the application.

Full Stack Todo Project

FullStack Web Developer , [Link-Todo Project](#)

Gilan, Iran

Mar 14, 2023

- A web application was developed using a full-stack approach, where both front-end and back-end development were handled.
- The data from the API was retrieved using the Axios library, and it was displayed on the front-end that was developed with React.
- On the back-end side of things, Node.js was utilized along with the Express framework to develop the server-side logic of the application.

- The data for the application was stored in a MongoDB database.
- Throughout this project, experience gained across various technologies and tools, allowing further development of skills as a software developer.

Rest Countries Dom Project

React Developer , [Link-Rest Countries](#)

Gilan, Iran

Feb 27, 2023

- A web application has been developed using React and styled component with React Bootstrap.
- React Router Dom has been utilized for routing, and data is fetched through an API and displayed on the application.
- The program includes a dark mode feature and features a select continent section and live search functionality to help users easily find their desired countries.
- The main goal of the project is to display country information to users

SKILLS

- | | | | |

| • JavaScript | • Nextjs | • React JS | • Redux |
| • AXIOS | • MUI | • Git | • Redux-toolkit |
| • Testing library | • React-Hook-Form | • Node JS | • Express JS |
| • MongoDB | • Mongoose | • Tailwind | • Figma |
| • Html | • Css | • Bootstrap | • SASS/SCSS |

EDUCATION

APSignals

Fullstack Certificate obtained from a bootcamp.

London, UK

Oct 2022 - Present

Gonbad Kavous University

Bachelor of Computer Engineering (concentration: software),
Honors: GPA A

Golestan, Iran

Oct 2020 - Present

CS50X

computer science Certificate obtained from CS50X

**Cambridge,
Massachusetts, USA**

July 2023 - Sep 2023

Language

- English

Interest

Nature trip with friends , play chess, Spend time with family .
